## PROFESSIONAL EXPERIENCE

**Inixio Technologies (intern)**

Software Company | June-2023 - Present

- Leading the design and development of cutting-edge web applications using React.js delivering customized solutions that exceed client expectations.
- Employing advanced coding techniques, such as TypeScript, to ensure robust code quality and scalability, resulting in high-performance outcomes for client projects..

## PROFESSIONAL PROJECTS

- **Various E-commerce Projects**
  - Developed multiple MERN stack e-commerce projects, creating dynamic platforms with secure authentication, product management systems, and responsive interfaces. Built robust RESTful APIs for optimized performance and scalability.
- **Movies Website**
  - Developed a Netflix-inspired movie streaming platform with external API integration for content aggregation and enhanced user experience. Implemented intuitive user interface design, user authentication, and personalized profiles. Employed modern web technologies for responsive design, ensuring seamless access across devices.
- **Social Media Website**
  - Developed a user-friendly social media site with profiles, news feeds, and messaging using HTML, CSS, and JavaScript. Incorporated responsive design for seamless viewing on all devices, enhancing user engagement.
- **Chat Application**
  - Created a real-time chat app using React for seamless communication. Integrated features like user authentication and message encryption, deployed on a scalable cloud platform.
